AdobePhoto shop / Gimp

InkScape

PROFESSIONAL SUMMARY

I am beginner game developer with experience in creating my own projects of mobile 2D games using Unity and Godot platforms. My portfolio showcases my progress and ability to bring my ideas to life. My strong expertise in Python and proficient web development skills enable me not only to craft game logic but also to integrate web technologies into the gaming experience to enhance user interaction. Additionally, I possess basic skills in Android Studio and MySQL, allowing me to work with mobile applications and databases to diversify project capabilities. My proficiency in Blender 3D opens up opportunities for creating unique 3D models and animations, adding depth and realism to my projects. Creative thinking and design skills are reinforced by my experience with Photoshop, Gimp, and InkScape, empowering me to create appealing visual elements for my games.
